

Rescue hook with safety lock

CH01AM

Alloy scaffold hook modified for rescue

Features:

- Main body anodised aluminium alloy
- Gate stainless steel
- Double action gate
- Gate opening: 62mm
- Overall Size: L 238mm, W 114mm
- Captive eye
- Modified gate with rescue safety lock

Aluminium Alloy body for reduced weight.

Anodised for corrosion protection.

Stainless steel gate for strength.

Double action gate is self closing and locking and allows one handed operation.

Captive eye keeps the loading close to the spine (thus reducing any loss in strength).

Modified gate reduces chance of cross loading the gate, when used with reach pole (MSRM), when rescuing a casualty.

Specifications:

NB: specifications and colour may change without notice.

Size: L 238mm, W 114mm

EN Test Mass: N/A

Loading: 22kN major axis

Conformity: EN362:2004/A

Materials: Aluminium body, stainless steel gate

Weight (kg): 0.48

Industries: Used in all work at height industries and rescue
