

Pulley, rescue Pro, 5cm, stainless

P04

Stainless steel, single sheave, rescue pulley.

Features:

- 50mm sheave
- Large attachment point
- Stainless steel construction
- Swing cheek

Large diameter sheave increases mechanical efficiency. Self lubricating bearing.

Large attachment point can accommodate up to 3 connectors for complex rigging systems.

Stainless steel side plates with nylon pulley wheel for corrosion resistance and reduced spark hazard.

Wide opening swivelling plates for easy attachment to rope.

Rope 13mm diameter or smaller.

Specifications:

NB: specifications and colour may change without notice.

Size: 5 cm

EN Test Mass: 30 kN

Loading: 3 kN

Conformity: EN 12278

Materials: Stainless steel sides with nylon pulley wheel mounted on oilite bearing.

Weight (kg): 0.27

Industries: Fire and rescue service, telecoms rigging, water rescue
